1. The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**
The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 month(s) from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-19	YES
	Claims	None	NO
Inventive step (IS)	Claims	1-19	YES
	Claims	None	NO
Industrial applicability (IA)	Claims	1-19	YES
	Claims	None	NO

2. Citations and explanations (Rule 70.7)

D: KR2002-26099 A (LG ELECTRONICS Inc.) 2002-04-06

The present invention suggests a dynamic searching method and apparatus of video contents for fast-forward operation using shot index information on the contents and the present play spot.

On the other hand, D relates to a fast-forward system and discloses a method of varying video play speed according to the complexity of video contents.

While the dynamic searching method described in claims 1-19 uses shot index information and the present play spot to decide play speed, D uses the complexity of motions in video contents to decide play speed.

Therefore, claims 1-19 of the present invention are considered to involve an inventive step under PCT Article 33(3).
